

JCC2 Evaporator Air Straightener Kit

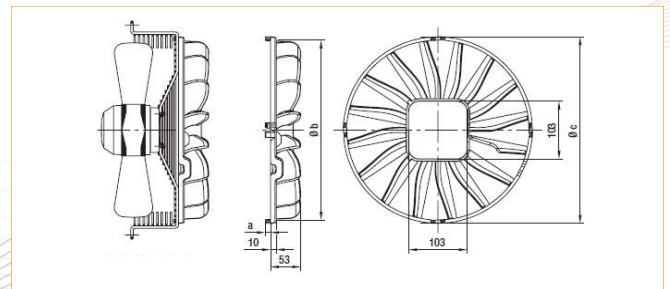

The JCC2 evaporator air straightener kit is available as a retrofit item for indoor unit models which utilises the EBM fan assembly. When fitted, this 'straightens' the airflow pushing more air forwards and increasing the airthrow distance.

Features

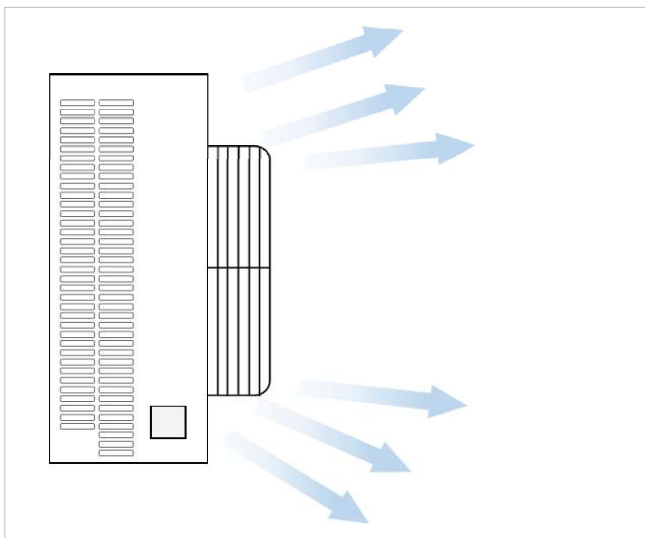

- For use on JCC indoor units with EBM fans
- Two piece kit
- Easy to install
- Straightens airflow distribution
- Enables increased air throw

J & E Hall part number N31080036

Typical Installation

Without air straightener

With air straightener
